

StoneWiz wall panels & 3-D perspective tiles are manufactured using state of the art Ultra High Performance Fiber Reinforced Concrete (UHPC). UHPC has characteristics of high compressive strength (90-120 MPA), high flexural strength (10-15 MPA) & very low porosity which is achieved by our proprietary formulation of precisely measured ratios of finely graded materials.

We are changing the perception of concrete from basic construction material to a product of luxury, beauty and aesthetics.

NATURAL WALL PANELS

Our wall panels with their very natural and earthy tones, shade differences and cloudy appearance will provide a very urbane and modern touch.

3-D PERSPECTIVE TILES

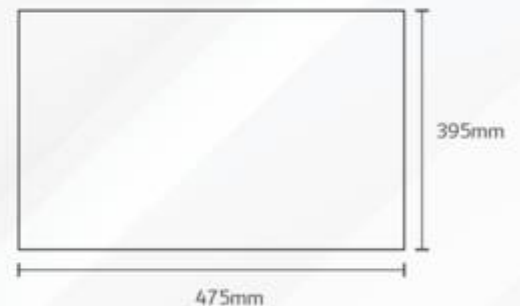

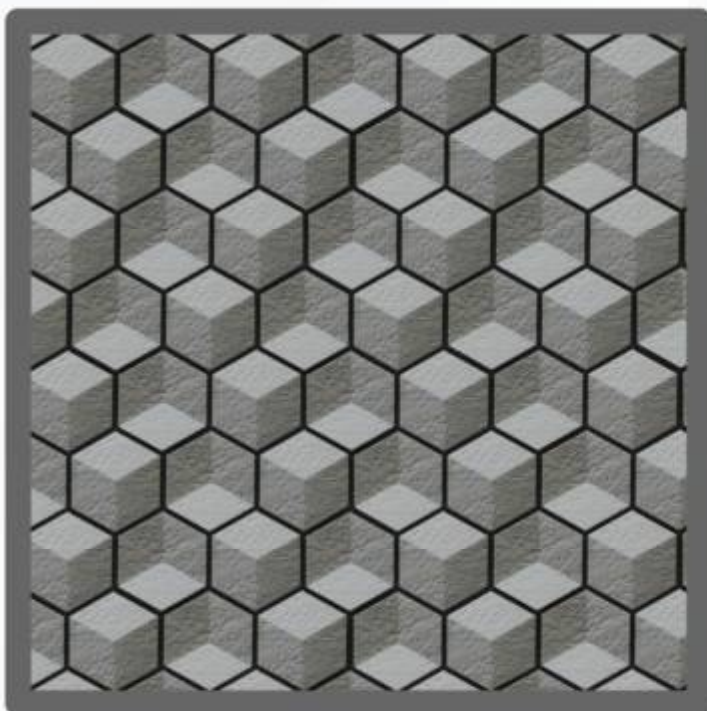

OBLIQUE

This series is very dynamic in nature as will enthrall you with multitude of shades created by play of light and shadows. The tiles in this series can be arranged to create multiple patterns and gives an edge to the designers as they can choose a pattern which suits their taste and design language.

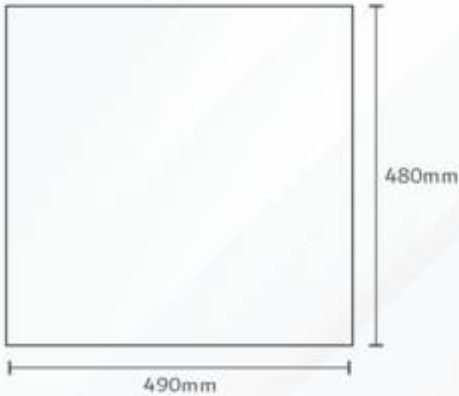

RUBIX

This design pattern consists of series of hexagonal structures and if put under proper lighting conditions will create mesmerizing patterns that will add a unique charm to your living space.

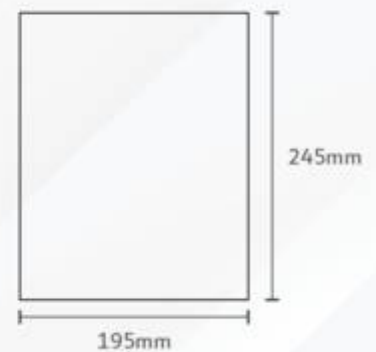

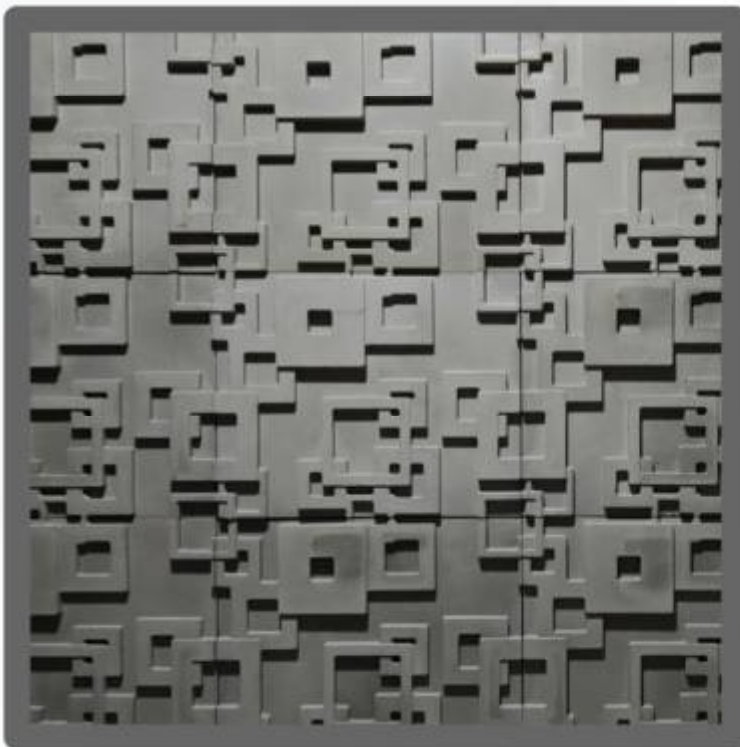

RIPPLES

This design pattern is designed to give out a bold statement and is not for the faint hearted. The tiles when fitted together create unending wave like patterns and can be arranged in either horizontal or vertical formats.

MATRIX

Matrix creates an intricate maze like pattern which will add a new perspective to your walls.

The tiles and panels shown in this catalog have only been displayed in natural grey color. Additional color choices for the same are available. Please contact us for more details

The colors of products displayed are as accurate as the photography and printing techniques may allow. You are requested to look at actual samples before placing your order.
